DETAILED ACTION

1. This action is responsive to amendment filed 2/28/07.

Response to Amendment

2. Examiner withdraws the 35 USC 101 rejections in the office action filed 11/28/06.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 14-18 and 23-29 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,590,996. Although the conflicting claims are not identical, they are not patentably distinct from each other because since independent claims 14 and 23 of the instant

Art Unit: 2624

application is broader than independent claims 1, 9 and 10 of patent '996, the features of independent claims of Patent '996 is fully disclosed in the independent claims of the instant application. Regarding dependent claims 15-18 and 24-29 of the instant application, it is similarly rejected to dependent claims 2-7 and 11-12 of patent '996.

Allowable Subject Matter

5. Claims 11-13 and 19-22 are allowed.
6. The following is an examiner's statement of reasons for allowance for independent claims 11 and 19. Prior art fails to teach the method of encoding a digital water mark based on color characteristics, transformed group samples at a color channel that receive encoding into a transform domain and altering coefficients of the color channel. Claims 12-13 and 20-22 depend on claims 11 and 19, respectively. Therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
